

The provided couple of vertical bar graphs give information about the love marriages and arranged marriages in Sweden over the period of 1980 to 2009.

At the first glance, as the matter of love marriages it began by 100 thousand in 1980 that rose rapidly to about 220 thousand in 1990 whereas, arranged marriages began with 350 thousand and fell back to same numbers in 1990, with a slight rise to 380 thousand in 1985. Thereafter, as the trend of love marriages grew from 2000 to 2009, the arranged marriages were less popular among the people of Sweden.

The second chart shows that in 1980, the percentage of broken up Swedish marriages in case of love marriages was far higher than that of arrange marriages . However, the gap narrowed down to being just about 13 and 11 percent respectively from 1985 to 1990. Again, the ratio regarding arranged marriages in case of broken up marriages grew slightly and other continued in down word trend gradually.

To summarize, it can be said from above explanation that love marriages are noticed to be successful with the passage of time.
